EDGE SOLUTION

Milling, sanding, coating and filling plants for panel edges, in wood, MDF, chipboard, and agglomerated materials

Tailored technology

Makor and Tecnolegno design and build, besides standalone machines, high productive plants for any requirement: for milling, sanding, coating, and sealing of edges. Several operating groups are available, able to match any kind of working requirements up to 100 m/min.

Innovative and customized transport systems guarantee the plant functioning and provide turnkey solutions.

- ✓ Customized design
- ✓ Extensive range of transport tracks, for any requirement
- ✓ Wide range of operating groups with manual and automatic setup: Milling groups, Sanding groups, Coating groups: roller, vacuum and pressure system
- ✓ Customized and highly performing transport systems
- ✓ Piece turning conveyor
- ✓ Piece returning conveyor
- ✓ Turnkey solutions
- ✓ Line management and control systems
