PROUDLY MADE IN ITALY

STU-FT/R4

Filling machine (heavy type)

Four speeds

- Suitable for application of UV paints/fillers on porous or smooth surface panels. Four independent speeds. The same machine can be used as stand-alone. Roller coater to apply base and top coat using only the dosing roller and the applicator roller. PVC belt drive system. With controls on a lecture-stand panel that is independent from the machine. PLC to manage machine commands. Complete with: up and down motorization of the two upper roller units with height shown on the display.
- ✓ Ideal to apply base coat and UV filler
- ✓ Maximum accuracy
- ✓ Belt transport system
